

See, track and reward the customers who bring you customers.

Your customers already refer friends and talk you up. Now you can see exactly who does it, with proof — and reward them your way.

Know who brings you business

Every referral, post and visit arrives with proof and a name. One tap to approve.

The reward is anything you choose

Airtime, a discount, a free cut, a cake slice, merch, cash — any amount, any form. You set what each action earns and the levels people climb.

A budget that can't run away

You set a reward cap once. It can never be raised, and every approval is a signed record.

**Set up your shop free.

ubutangaza.biz/waitlist

Any business can join, set its own rewards and create campaigns — "Bring a friend this month", "Post about us". Ten-minute setup. No app for your customers to install — they sign in with Google.

Four steps. Zero dashboard babysitting.

1

Join and create a campaign

Register your business, say what you reward — a referral, a post, a visit — and launch a campaign with a goal and a deadline.

2

Share the campaign link

Your customers join in seconds. Each gets a personal link to bring friends with, and you see who joins through whom.

3

Approve with one tap

Proof comes attached — the post, a photo, the referred name. Approve or reject from your phone.

4

Honour the reward

Customers see exactly where they stand ("2 more to a free cut"). You see exactly what you owe.

THE REWARD IS ANYTHING YOUR BUSINESS CHOOSES

You decide what an action is worth to you — in your own money, product or service. For example:

KSh 500 airtime

15% off next visit

Free haircut after 5 referrals

A cake slice

Data bundle

Voucher

Merch

Cash via M-Pesa

A free class

VIP early access

Built in Nairobi. Born at the Avalanche Team1 Game Jam, now in the Retail & SME Loyalty incubation track. Runs on Avalanche as the record-keeper only: no tokens, no wallets, nothing for you or your customers to buy. M-Pesa Till referral pilot: a referred payment verifies itself.
